EXECUTIVE SUMMARY

Performance-driven Front-End Developer with 3+ years of experience engineering scalable, complex enterprise web applications using React.js, TypeScript, Vite, Tailwind CSS, and Material UI. Proven track record of leading frontend development for procurement and management platforms, architecting modular UI component libraries, and streamlining data workflows with TanStack Router/Query and Redux Toolkit. Specialized in building multi-tenant dashboards, interactive drag-and-drop engines, bilingual Arabic RTL interfaces, and end-to-end frontend architecture documentation.

PROFESSIONAL EXPERIENCE

Front-end Developer — Quotem

May 2024 – Present

- **Enterprise Application Architecture:** Architected and built scalable frontend modules for a complex procurement platform using React, TypeScript, Material UI, and Tailwind CSS, focusing on requisition management, quotation comparisons, and data-dense dashboards.
- **State & Data Flow Optimization:** Streamlined server-state synchronization and client routing utilizing TanStack Query and TanStack Router, eliminating redundant network calls and enhancing UI responsiveness.
- **Interactive UI & Component Engineering:** Engineered interactive user flows featuring drag-and-drop boards (dnd-kit), guided onboarding tours (React Joyride), and dynamic form validation engines (Yup / React Hook Form).
- **Architecture Documentation & Feature Flags:** Authored and maintained production frontend documentation (VitePress, Mermaid) covering component systems, state patterns, and API contracts; integrated Flipt for feature flag management.
- **Internationalization (i18n):** Delivered complete bilingual support (English/Arabic) with dynamic RTL layout switching using React Intl.
- **Technical Leadership & Quality Assurance:** Coordinated the frontend engineering team through task planning, sprint distribution, cross-functional collaboration with backend/product teams, and code reviews.

Front-end Developer — ITSpark

Jan 2024 – May 2024

- **Web Application Maintenance & Feature Delivery:** Enhanced features, resolved critical bugs, and optimized client web applications (e.g., 3ayzdoctor) to boost performance and accessibility.
- **SEO & Metadata Optimization:** Implemented Google Schema markup across client platforms, increasing web visibility, indexing efficiency, and organic search ranking.
- **CMS & E-Commerce Engineering:** Customized and delivered tailored WordPress and Shopify platforms (Doctorz, Silver Sky, Mar Marcos Hospital, Implement Engineering Consultants).
- **Requirements & Prototyping:** Gathered technical requirements from clients and delivered wireframes, paper prototypes, and Figma designs.

Front-end Developer — Artra Trading

Sep 2023 – Dec 2023

- **End-to-End Delivery:** Engineered and shipped client web platforms from initial requirement analysis to final production release (e.g., Al-Rashed, Artra Trading, MasaderEgy).
- **UI Refactoring & Maintenance:** Maintained legacy platforms and integrated requested functional modules while maintaining UI responsiveness.

Implementation Engineer — Super Online Academy

July 2022 – Sep 2022

- **Technical Specs & Testing:** Translated client requirements into technical documentation and performed functional quality assurance testing prior to releases.

TECHNICAL SKILLS

Frontend Stack: React.js, TypeScript, JavaScript (ES6+), Vite, HTML5, CSS3/SASS, Tailwind CSS, Material UI, Bootstrap

State & Data Fetching: TanStack Query (React Query), TanStack Router, Redux Toolkit, Axios, Context API

Architecture & Tooling: VitePress, Mermaid (Architecture Docs), Flipt (Feature Flags), React Intl (i18n/RTL), dnd-kit, Yup

Backend & Database: Supabase (PostgreSQL, Auth, Storage, Realtime), Basic PHP, SQL

CMS & E-Commerce: WordPress Development, Shopify Customization

Design & Collaboration: Figma, Adobe Illustrator, Git, GitHub, Jira, ClickUp, Agile/Scrum

FEATURED PROJECTS

HireFlow – Multi-Portal Hiring Platform

Live Demo: https://hireflow-sigma-nine.vercel.app/ | GitHub: github.com/MayarrAteff/hireflow

- **Multi-Portal Architecture:** Built recruiter and candidate portals with distinct role-based permissions, theme support, and Arabic RTL translation using React, TypeScript, and Supabase.
- **Core Capabilities:** Engineered dynamic candidate drag-and-drop workflow boards (dnd-kit), multi-step job posting forms with live previews, auto skill-match ranking, and real-time application updates.

EDUCATION & TRAINING

Bachelor of Science in Software Industry & Multimedia — Alexandria University (2018 – 2022)

Graduated with Distinction / Excellent | CGPA: 3.6 / 4.0

Information Technology Institute (ITI) Internship — Mobile Application Development (Android) | July 2020 – Aug 2020 (102 Hours)
